ORANGERIE, CUSTOM MADE PROJECT IN DOHA

Dfn proves to live up to even most demanding clients' expectations, wherever a custom-made outdoor project is needed and whenever a both elegant and stylish furniture is required. DFN has been selected by an exceptional customer for the creation of an exclusive orangerie in Doha that will house a prestigious chocolate shop and café.

The structure, entirely made of iron and glass, has been designed to have a classic look while providing the ultimate technological equipments such as an outstanding integrated air conditioning system for the maximum comfort of the guests, as well as a spectacular lighting installation.

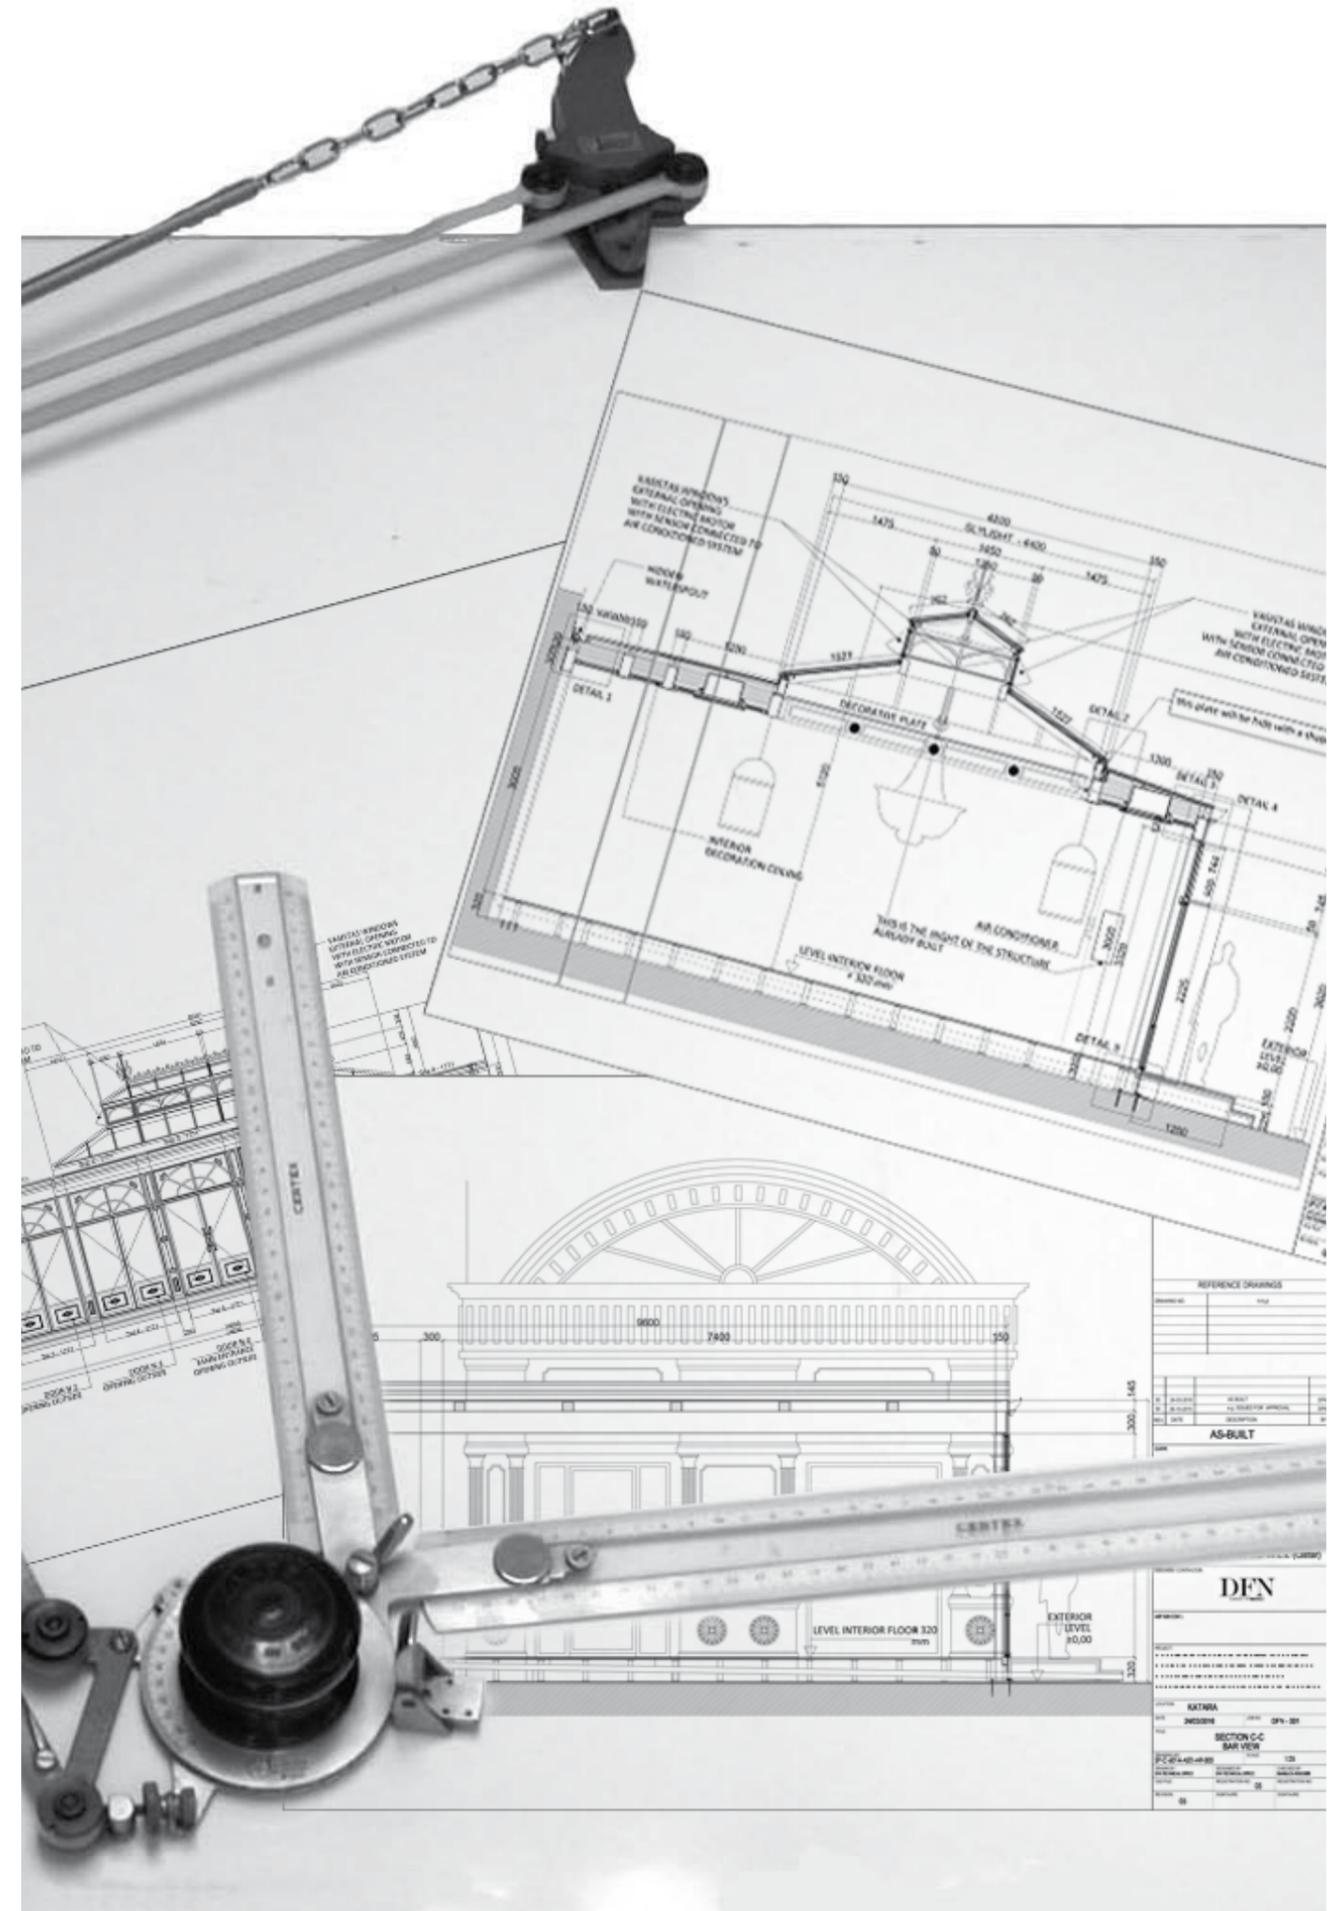

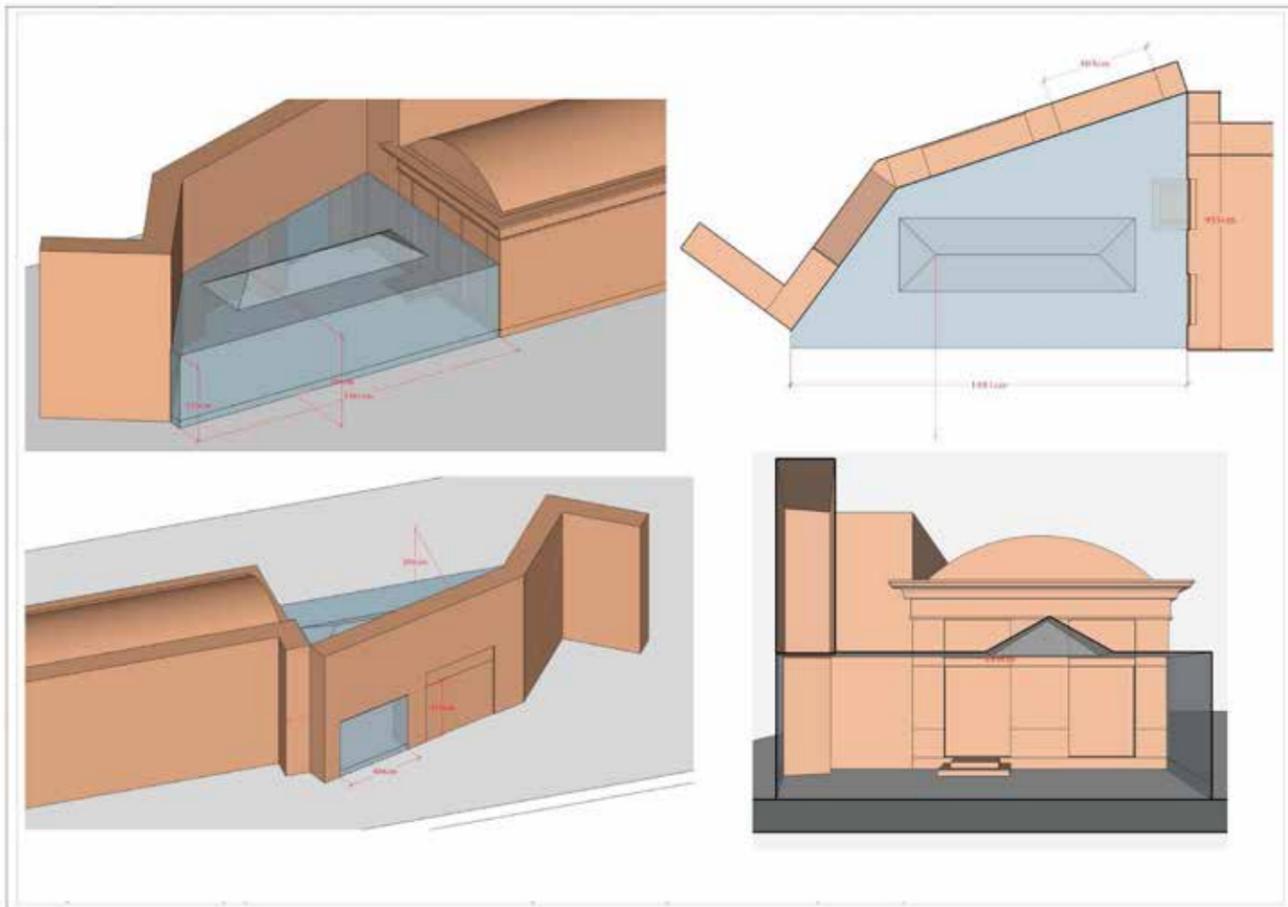

Therefore, the aesthetic research made by DFN do not forget the importance of functionality. As for the design finishes, the company has realized the whole ad hoc set-up: nothing was recovered from the market but everything was specifically custom-made, from the shape of the structure, up to the decorations on the exterior facades, the same as for handles and floors – these ones have been realized with precious coloured cement tiles.

The Orangerie Doha project, conceived and developed by DFN at every stage from design to execution, is an opportunity for the company to give voice to its ability to cross national boundaries and to be an undisputed partner for any outdoor project where both performance and exclusivity are needed.
