

BONALDO

Skipping

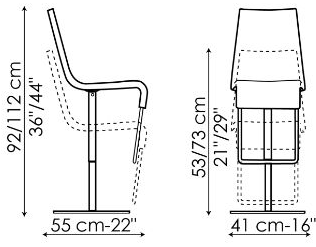

Skipping is a swivel stool with backrest that offers an adjustable height thanks to a robust piston mechanism. Available with upholstery in eco-leather, leather or emery-leather, it is particularly comfortable thanks to the sinuous shapes of the seat, with cold foamed polyurethane padding. The structure and the footrest are made of matt painted metal or chrome-plated steel. With its understated, curvilinear but minimalist line and design by Karim Rashid,

Skipping is welcoming and comfortable and integrates perfectly within original environments, characterised by sophisticated atmospheres. A flexible, extremely pure and contemporary sign: an original and fascinating object that as the dominant character in any space with its agile and dynamic presence, appears comfortable and inviting right from the first glance.
