Le sete di Como

29703

С XVIII века город Como (наравне с Лионом во Франции) по праву считается европейской столицей шёлка. Портьерные ткани, ткани для одежды и для драпировки стен производились более двух веков. Уровень мастерства достиг неодолимой компетентности, которая и сегодня позволяет создавать шёлка для домов высокой моды. Источниками вдохновения для этой новой коллекции послужили дизайны из исторических архивов. В основу выбора легли лёгкие великолепные структуры, благодаря которым достигнуто эффектное сочетание изысканной умеренности и элегантности.
